

I am writing regarding the recent proposal to use Low Power FM stations and give them priority over the current FM translator service. I am a concerned citizen that is in opposition to this proposal for it would have a detrimental affect on my household as it would not allow K-LOVE 91.1 FM to be broadcast. KLOVE serves our local community by broadcasting positive and encouraging music & messages nationwide including my local community. The LPFM would eliminate KLOVE's ability to broadcast in my area and many others around the country. In this day and age positive and encouraging music is very hard to find and this station does an exceptional job of broadcasting just that to millions of listeners. My family and I listen to KLOVE 91.1 on a daily, sometimes hourly, basis. It would not serve the public interest to switch the emphasis from the current FM translator service to LPFM and eliminate positive programs such as these. As a concerned citizen I ask that this proposal not be considered any further for implementation.
